

Plastic Surface Cleaner

With the cleaning path being 28 - 38 cm/12-15inch (according to the different model selected), compared to the cleaning width of about 5 cm of the standard nozzle, it can greatly improve the cleaning efficiency for cleaning a large area. When in use, the high-pressure water jetting and the rotating motion will produce a steady uplift force for easy maneuver. The fixed cleaning height can ensure a uniform cleaning effect. When cleaning, the cover plate can prevent splashing out to ensure the safety of the operator. Suitable for large area cleaning operations such as driveways, walkways, courtyards, streets, parking lots, etc.

PLFC-GF15

GF15 Plastic 15-inch Flipping Surface Cleaner

Easily flip over the castor direction to clean the floor or undercarriage

Separating the castor fixing tube and support piece, it is easy to flip by turning over the wheel. Durable rotatory construction with dual bearing and ceramic seat (Tungsten is optional). The added swivel castor can increase the stability and maneuverability.

Max Temp.: 60°C/140°F

Max Pressure: 3600psi/248bar

Inlet Fitting: 1/4" QD plug

Nozzle Orifice: 2 x 2.0
